I just realized how invincible riptids and storms will shoot attacks. Every time someone shoots a lascannon at you, you can just deflect all 6 wounds on a lame drone gun and laugh as your full hp riptide ripsid ripsed their new one. Also, with pathfinders now having 8pts head and being able to shoot both their markers and carbines at the same time, I am seriously considering replacing my screening kroot with trackers. In the 7th for tournaments there were basically only Stormsurge, Mininum load suits/kroot, markerdrones and Riptides. It's nice to see a list of potentially good units more than double like this. I agree with your take on most units, although I have suspicions that some crisis costume installations will be worth it just because they Allow you to deepstrike gun drone squadrons. Page 2 If you need toys for girls, American Girl has you covered-we carry dolls for girls of all ages! Our 18-inch dolls for girls 8 and up include our BeForever BeForever line historical characters, as well as a plethora of modern dolls that will spark her imagination. American girl doll Red HairAmerican Girl Doll 'Samantha'You gave your daughter an American Girl doll and it was love at first sight. Now they are inseparable. Whether it's a tea party or a trampoline jump, the doll is always in your child's arms. Now your daughter is in tears because her favorite toy needs repair. The good news is that you can fix minor problems yourself. (Basic issues such as a separate limb are best left in the manufacturer's doll hospital.) Here are some easy ways to fix your American Girl doll at home. American Girl doll heads are held on the spot by strings tied at the base of the neck. Over time, the doll's head can be weakened by regular play. The head can even fall off the rough game. However, both problems are easily resolved. Find the knotted strings on the back of the doll's head, where the neck and body tissue meet. Untie the knot. Check the strings for signs of damage, especially if the doll's head has fallen. If the strings are damaged, you will need to send the doll to the manufacturer's hospital to replace the strings. If the lines are in order, move on to the next step. If you tighten your head, take your head off. Set it aside. Gently widen the hole in the neck on the body of the fabric. Make sure not to stretch the hole too far, so that the strings are retracted. Reach the hole and gently push the filling down. Place your head in a hole. Gently press your head down firmly until the neck fits the hole and rests at the base of the neck. Tie the strings with two knots on the back of the neck. The doll's head should feel safe, but still be able to rotate. The puppet hospital manufacturer will repair the free limbs by resting the doll. Rest the doll at home is possible with the right equipment, but is not recommended because you can easily damage the doll. It is better to leave rest to experts. However, there is another way to repair free doll limbs at home that works just as well. This method is quick and simple. First, untie the strings at the base of your doll's neck and remove the head. Put your head aside. Expand the hole in the body tissue so that you have room to reach inside. Be careful not to make the strings get involved. Take all the stuffing from the doll and set it aside. Once you remove the filling, you will see elastic cords attached to the joints for all four limbs. Reach inside the doll and find the elastic cord and joint of the weakened limbs you plan to fix. For free feet, you have to fix both. Sometimes only one hand may need repair. However, you can tighten both to prevent the need to repair the doll again soon. You will notice that the joint consists of a plastic cup, ferrula and washer. Looks like a flattened metal clip. Examine the cord for excessive wear. If the cord is badly worn, you should have a doll of the hospital maker's holiday dolls. Take an elastic cord and pull it tightly. Take Take rubber band and loop it around the elastic cord so that it rests on both the cord and the ferr. Tighten the elastic band until the elastic is held tight again. Repeat on the second limb and any others that require attention. Put the stuffing back in the doll. Pack the filling tightly so that the doll's body is oval and soft. Place your head in a neck hole. Make sure the head is safe and then knot the string in half. Your doll must now be ready to dress up and play with. Bilateral Silver Eye in a.Silver Eye is a defect in the eye of American Girl dolls where the inner eye sticker begins to detth from the eyes. The eye begins to take on a silver look from the squad. This usually happens with specific eye types, primarily pinwheel eye stickers. The main cause of silver eye heat exposure, for example, with a hairdryer or too much sun; The secondary cause is the liquid effects of the eyes. This is mainly manifested in older dolls, due to their age and therefore more likely and more time for exposure. American Girl Dolls Red HairThis usually starts to appear in one eye in front of the other, and it is quite possible only one eye to be touched. Bubble EyeA with a noticeable blistering eye and a moderate silver eye. The eye bubble is less seen by variations of the silver eye. It starts next to the pupil's eye and resembles a bubble formation, hence the name. Unlike the silver eye, a bubble eye can affect any doll with pinwheel-style eyes that have been manufactured by the Pleasant Company. It can also be the result of rust in the eyes. The Matrix 1999 sci-fi film starring Keanu Reeves as a low office worker and underground computer hacker known as Neo, who discovers that his whole world is not what it seems. I was looking for an answer. It's a question that drives us, Neo. That's the question that brought you here. You know the question, just like I did.: What is the matrix?: The answer is there, Neo. He is looking for you and he will find you if you want him.: This is your last chance. After this, there is no turning back. You take the blue pill - the story ends, you wake up in your bed and believe everything you want to believe. You take the red pill - you stay in Wonderland and I'll show you how deep the rabbit hole goes.: You do?: I go with you.: No, you don't.: No? Let me tell you what I believe. I believe that Morpheus Morpheus more for me than it does for you. I believe that if you are really serious about saving him, you will need my help. And since I'm a rating officer on this ship, if you don't like it. I believe you can go to hell. Because you're not going anywhere else. Tank, load us.: You know, I know this steak doesn't exist. I know that when I put it in my mouth, the Matrix tells my brain that it is juicy and delicious. After nine years, you know what I understand? Takes a steak bite: Ignorance of bliss lines: I know you're there. I can feel you now. I know you're scared. You're afraid of us. You're afraid of change. I don't know the future. I didn't come here to tell you how this was going to end. I came here to tell you how it's going to start. I'm going to hang up, and then I'm going to show these people what

you don't want them to see. I'll show them the world without you. A world without rules and control, without borders and borders. A world where anything is possible. Where we go from there there is a choice that I leave to you.: I know what you think, because now I think the same thing. In fact, I thought that since then I got here: Why, why not take the BLUE pills?at the war that devastated the real world: We don't know who hit first, us or them. But we know we're the one who burned the sky. At that time they depended on solar energy. It was believed that they could not survive without such a abundant source of energy as the sun.: Unfortunately, no one can say what the Matrix is. You have to see it for yourself.: Throughout human history, we have been addicted to machines to survive. Fate seems not without a sense of irony.: I wanted to share the revelation I had during my time here. This came to me when I tried to classify your species, and I realized that you're not really mammals. Every mammal on this planet instinctively develops a natural equilibrium with the environment, but you humans don't. You move into the area and you multiply and multiply until every natural resource is consumed, and the only way you can survive is to spread to another area. There is another organism on this planet that follows the same pattern. Do you know what that is? Humans are a disease, a cancer of this planet. You're the plague, and we're the cure.: I'm trying to free your mind, Neo. But all I can do is show you the door. You're the one who has to go through this.: I'd ask you to sit down, but. And don't worry about the vase.: What vase? Neo turns to look for the vase, and as he does so, he wrapped a vase of flowers that collapses on the floor: This vase. Neo: Sorry.: I said don't worry about it. I'll put one of my kids to fix it.: How do you know?: That's actually going to bake noodles later, would you still break it if I didn't say anything?: What are you trying to tell me? That I can dodge bullets?: No, Neo. I'm trying You that when you are ready, you do not have.: Have you ever stood and looked at him, marveled at his beauty, his genius? Billions of people just live their lives without paying attention. Did you know that the first Matrix was designed to be a perfect human world where no one suffered, where everyone would be happy? It was a disaster. No one would agree with the program, whole crops were lost. Some felt that we lacked the programming language to describe your ideal world, but I believe that, as a species, human beings define their reality through suffering and suffering. The Matrix Reboot of Trinity Shooting Perfect World was a dream that your primitive brain was trying to wake up from. That's why the Matrix has been redesigned to this, the peak of your civilization. I say your civilization, because once we started thinking for you, it really became our civilization, which of course is what it's all about. Like a dinosaur. I'll look out the window. You had time. The future is our world, Morpheus. The future of our time.: There is no spoon.: The Matrix has you. Page 4 Here's a quick guide, put together with some, but mostly I, on how to be able to play the Co-op with friends on Hamachi.You don't need any dirty settings, you don't need to turn off the firewall, you don't even need to be able to ping your friends on the Hamachi network! Here's how: #1Download version of Hamachi, preferably version 1.0.1.5. It can be found by. Install it, and don't bother with the license notification and all that. Make sure the new Hamachi runs on the firewall exception list (if you've had it there before, it should still be there)! Connect to a regular network and meet friends. #2Go, choose a mirror, search for a world at war and find it, and in a list of patches and fixes, download LAN fix #1. Use the downloaded patch to fix your current.exe file, and make sure it backs it up (the option is a checkbox). #3Open recently patched.exe (no mp.exe file) and hold a co-op game. Please make sure that PunkBuster is off, both in your game options and your game settings (inside the lobby). Tell your friends to search the server and make sure they have a source set for LAN. Connect, play and have fun! Vanoss Wau Dylan Truschel. Call of Duty: Nazi zombies w/ Friends: Five nights in The Freddie Edition. Play now; Call of Duty: WaW Custom zombie Funny Moments. October 2, 2010 - Hey, I like to play COD WAW, but I don't have the original game (I don't. I don't know how to play crack cod WAW zombies and I really want to. FootnotesIf you can't get this job done, try messing around with firewall settings (maybe even try to turn it off) and try playing with the menu in the game. Also settings may be interested. If nothing works, try allowing the hoster to hoster and everyone else contact patched.exe.Also, according to the commenter, Ratz4, it is important that the host launches his game as an administrator, right clicking on the label and clicking Run as an administrator! Hi.lk was geen moeite on Tresna 4 in all seeing the eye X-fire aan het werk te krijgen. Maar Code 5 lukt me niet. Ook niet in een andere game tracker. En ik word helemaal geschuffeld van het handmatig ip nrs intypen met zoveel volle servers.10 min. Of meer is geen uitzondering;(DUS!s er iemand die mij kan uitleggen waarom het niet gewoon met X-fire lukt (via een private north site zoals cod 4) moths je cod 5 dan wel in all seeing eyes moet voegen? Of hamachi het better? Of? BIJ WURBAAT DANK!. OMGForgot is one was an English ☺ As said before I've never had a problem with adding cod 4 for all seeing eyes, or clicking on the X-fire icon on a private server site. But I don't manage in any way with Cod 5.And typing IP nrs manually into console freaks me out with so many full servers ☺ 10 mins or more is no exception ☺Moy anyone please explain to me how to add cod 5 in all seeing eyes? Or why is the normal X-fire way not working? Or should I switch to Hamachi? (Should I add the game there in such a complicated way as in all eyes?) Or? THX ADVANCE!. Hi. I also got some kind of problem. There's someone here who can help me. I'm trying to run a cod5 co-op through a hamchi between 2-3 computers. I have hamach. I can ping and communicate with others (s) and enz. In the game I can successfully hold the game. Another (in) can see my server. But when they join it says something like: the game session is no longer available.'some info (maby) intrest:2 of the 3 comps use wireless connections (those who ment join the server)1 out of 1 3 comps uses LAN directly to routerthis comp should by any means be the hostwe also use the version 1.5 (cracked) version cod5.hamachi at least the latest of hamachi 2. (I can't find which version) and everyone uses LANfix for 1.5.this I tried.portforwating.changing to metric thing (which disabeld the internet which is bad) I also tried tuggle but that turns out that it can't find a network cable or something.as far as I know I have everything installed right. I followed the loats of intuitions on the internet and all whare failing. I also tried 1.0.5.0 of hamachi, but it was even worse troubleholic games (where you can enter IP to join the server, most of them) work fine. Also, there way to join the game is cod5 based on IP.so just entering ip. And not trough te browser.thanks.The majority of Call of Duty fans love the zombie mode that was introduced in World at War, and since then the zombie mode in call of Duty games has become a huge success! Not only that, but ultimately, the casual and hardcore gamers alike sought to make their custom zombie cards and then presented them publicly to all to download and play. However, it seems obvious that not all fans of zombie game games they know how to get hold of these cards, or where they will start looking for their downloads. This guide will show you how you can play these cards as well as the best source to download them. How to play Waw Custom zombies with friendsFirst step to being able to play these custom cards, is to have the latest version of Call of Duty World at War downloaded from Steam, and fully installed on your computer. Without a game already installed on your computer, custom zombie card files can't be stored in a mod folder because it doesn't exist. The game is currently going to around 19.99 pounds on Steam, which is quite cheap for a game of this quality, but perhaps it's quite expensive for a game of this age. Therefore, if you feel that this price is too steep for such an old game, then you should consider buying it from Amazon, or other respectable sources. Remember that you have to buy a PC version of this game, as it may not work on the Xbox 360 or PS3 version. Now this is where the fun begins. The first step to downloading one of the custom zombie maps is to join ZombieModding.com or CustomCOD.com, as these are the main websites in providing maps. My personal preference between the two will be zombie modding, as it is the most convenient of the sites, and has some great forum posts and a guide for you to follow. (For issues such as downloading and saving cards.) Although, CustomCOD provides some maps that zombie Modding doesn't do, which can always be a reasonable excuse to go with CustomCod instead. In terms of registration for these sites, forms are pretty standard for most websites. You must first accept an agreement with the website and then provide your data based on what they require. Don't worry about it, since the modding zombie is a well-trusted site with thousands of members, and will never disclose your information to anyone else. Once you've created your own account on either of the two websites, you can visit the released map page and search through available downloads. To get to this page is simple.. Go to the Download tab. Then click on the Sub Category called Maps under the Nazi zombie Tab. Next, visit the issued link to the maps and review all available maps. How to play cod waw zombies with PcFinally friends, choose the one you want based on each card frames and details. You can click on each of the options to see the map footage on YouTube, and find the link you need to download the map. You will then be re-directed to the gamefront where you can download the file, usually from a server in France or the US. This is the standard for maps on zombie modding, have your own automatic installer that will place and extract all the files in the right folder. This means you don't have to find everything self, and then extract them yourself too. In fact, if you have little time or don't want to go looking for files, then I would we recommend considering using only zombie modding, but otherwise CustomCOD is a viable option. Obviously, depending on the card you've chosen to install, will affect how long it takes to install to complete the file extraction. But this process usually does not take too long, and is very easy to complete. Finally, you downloaded the user card and installed it on your computer. There is only one more step now and it is to run it in Call of Duty: World at War. To do this, start the game through. Steam and then go to the main menu, after a short video clip. Once in the main menu of Call of Duty: World at War, you have to open the fashion section and run a loaded map. The game will usually close at this point and then reopen. Depending on the card, you can either simply click on the option that says solo, or you may have to enter the command into the console. If so, press 'on the keyboard, at the same time in the main menu and then in the box that opens, in the next.' To start the map, just click the type on the keyboard and then start. Lego Rogue One Imperial Battle PacksLego Rogue One Imperial Battle Packs14 December 2016: The second range of Rogue One lego Star Wars has just begun hitting shelves in Australia, from all places. Adam S. via Star Wars LEGO Australia Group on Facebook, reports that his local Toyworld in Melbourne's north-west has a 75,172 Y-wing Starfighter, 75171 Battle for Scarif, 75164 Rebel Trooper Battle Pack, 75165 Imperial Trooper Battle Pack and four new ones. It's going to be a good year for those who love both Legos and Star Wars - Lego is adding over 30 Star Wars themed sets to its lineup this year. Space.com got a first look at. The second Rogue One range of LEGO Star Wars has just started hitting shelves in Australia, of all places. Adam S. via Star Wars LEGO Australia on Facebook, reports that his local resident in Melbourne's north-west has a 75,172 Y-wing Starfighter, 75171 Battle of Scarif, 75164 Rebel Trooper Battle Pack, 75165 Imperial Trooper Battle Pack and four new MicroFighter kits (75160 U-Wing, 75161 TIE Striker, 75162 Y-Wing and 75163 Krennic's Imperial Shuttle) stock long before the expected release date in early January. UPDATE: Nick P also sends word that he's seen them in Melbourne's suburban Branches of BigW, while David L spotted them at BigW in south-east queensland this morning. Looks like they're officially in the wild now so go grab a spear gun and scream Crikey! These new projects are so good, fresh, but definitely fits into the world of the OC trilogy. I especially like U-Wing, it's a bit strange when you think of it as a transporter mixed with a cruiser, but once you see it as your own thing, it's awesome. The shuttle's krennik is cool, but with each new imperial-shaped shuttle the design becomes less interesting. These hover tank soldiers are my favorite Of the series though, they are the type of mini-figure that make you forget what you're looking at on the Lego guy. One thing I've been curious about since TFA is the question of how many remake sets for these new movies will be made. Will they make multiple remakes of U-Wing, as they do with AT-AT. Or will they find new things from the movie to remake? Maybe eventually it will be basically a sequel to the trilogy and TV show sets with the original trilogy set is the exception? I'd be fine with that, but only time will tell. Stryder. Page 9 Video card or processor getting too hot. At least that's what it seems to be from your description. Let me see if I can find some monitoring tools if no one posts them in the first place. I use what came with my ASUS equipment so they wouldn't work with your moboard. I'll be back to you in a few minutes if no one does in the first place. It gives you a processor and GPU temps plus a lot of other information. You will see this in the upper left direction of the column. The left picture below The release of The Boot First Down is what you need. The Dell Monitor continues to go into sleepMonitor continues to sleep Windows 10Dec 26, 2017 - But what if your Windows 10 continues to sleep after a few minutes of downtime? Unfortunately, a dose of caffeine won't help. And your computer has. August 9, 2011 - My monitor continues to go into sleep mode after use for 5-10 minutes. But the processor is still working. I can still hear my songs playing from someone. No signal, the monitor will sleep shows on the screen. On my monitor is a message that comes and says: no signal input, then another message to come on monito that says the monitor is going to sleep. Then the monitor goes to sleep and I can't get anything else come up on the monitor. And when I plug the power cord into my tower and plug in. It's not a big download. Once downloaded, remove the files. Inside the folder you will see a blue magician figure next to SIV64X.exe click that to open. Then you will see the right pic below, hopefully with temperatures like mine does. I circled the processor and GPU, which is the lower temperature. Hopefully that helps and works. Post temps when you get them. Mike.
